

**Texana Groundwater Conservation District**

**Well Registration Application for Non-Grandfathered Exempt-Use Well**

All non-grandfathered exempt wells drilled after February 25, 2011, are required to be registered with the Texana Groundwater Conservation District. Registration of an exempt well will assist the District in the protection of our groundwater.

**Exempt-Use Well – means**

1. A well used solely for domestic use, livestock use, personal recreational use; or
2. A well that is operated to produce groundwater not in excess of 35,000 gallons per day; or
3. A well otherwise exempted from District regulation by state law.

***A well used for any other purpose is considered a non-exempt well.***

The District will not require meters on exempt wells. The District will not enter private property to complete the registration process of exempt wells without property owner’s consent.
